

ACT® Math: A Pathway to Postsecondary Enrollment and Success

Academic preparedness begins the first day of school.

All workshops will be tailored to meet the needs of your school or district...length, grade, and content.

Academic preparedness leads to postsecondary persistence and completion. ACT® is a proven measure of a student's readiness. We offer a range of services to equip teachers to better prepare students for this very important assessment.

Professional Development Offerings:

Teacher Version

This professional development opportunity is focused on the math portion of the ACT® assessment. Teachers will learn:

- ACT® test format
- Test-taking strategies...general and math
- Math-specific content strategies and activities
- How ACT® math content progresses from kindergarten through the 12th grade

Parent Version

In a 2-hour session, parents will learn ways to support their students at home to prepare for the math portion of the ACT®.
