

"Just in Time" Math

This set of professional learning opportunities provides teachers the chance to brush up on math-specific content knowledge and pedagogy "just in time" to implement it in the classroom.

For example, are your teachers about to teach ratios and proportions? Schedule a "just in time" workshop that focuses exclusively on ratios and proportions. Teachers will leave with ready-to-use activities "just in time."

The workshops are:

- Aligned to TN State Standards in mathematics
- Grade-level specific
- Hands-on
- Task-based

At the end of each workshop, teachers will be equipped with the knowledge and skills to effectively teach upcoming math content in their classrooms.

Workshops are intended for audiences of 15-20. However, if your district does not have enough grade level teachers to support that enrollment number, alternative formats are available.

Example Workshop Format: Content Focus on Fractions

| | |
|---------------|--------------------|
| 8:00 - 10:00 | 3rd Grade Teachers |
| 10:00 - 12:00 | 4th Grade Teachers |
| 1:00 - 2:00 | 5th Grade Teachers |
